

Made in Norway

Ekornes® and the environment

Ekornes takes responsibility for the environmental impact caused by the manufacturing, distribution, use and destruction of the company's products. Over a long period the company has implemented measures at its manufacturing plants to improve the internal and external environment, while also selecting more environment-friendly raw materials. The sustainable manufacture of products with a long useful lifespan will continue to be an objective in the future development of the company.

The following key principles shall be complied with in all parts of our business:

- Ekornes shall be perceived as an environment-friendly company. Our products shall have as little impact as possible on the environment.
- Ekornes aims to minimize the health risk experienced by employees in the workplace.
- Ekornes invests to avoid damage to the environment and to health.
- Environmental information shall be freely available, e.g. through environmental product declarations (EPD).
- Ekornes shall accurately and openly publish information about how the company handles its environmental responsibility.

Ekornes participates in the UN's Global compact.

For more information regarding specific measures we have implemented or are planning, you can download a longer version of our environmental policy document from www.ekornes.com

THE INNOVATORS OF COMFORT™

THE COMFORT COLLECTION 2010/2011

Stressless® – the Comfort story

Every Stressless® has a story. And each of those stories begins and ends with the word “comfort”. Making the world’s finest recliners involves thinking and rethinking the word “comfort” for over 30 years. That does not mean that we compromise on look and style, as you will see. But what it all comes down to is how your body reacts when seated. That’s where a Stressless® redefines comfort as you know it.

You see: Every detail in a Stressless® is there for a reason. Their sole purpose is to make you as comfortable as possible. In our quest to make the ultimate recliner, we have invented technologies that put a Stressless® two steps ahead. Like the Plus™ System, the Stressless® Glide system and the patented headrest. But enough talk: The only way to fully understand true relaxation, is to go out and try one. Today.

We thought; why shouldn't a sofa be just as comfortable as a recliner? So we created low-back and high-back Stressless® sofas, where every seat back is individually adjustable.

Like people, Stressless® recliners come in different shapes, colors and sizes.

A corner set-up isn't just for ballroom-sized living rooms. Stressless® lets you choose from a number of combinations, to fit virtually any living space.

Stressless® is endorsed by the American Chiropractic Association.

NEW *Stressless® with ErgoAdapt™ system. We like the liberty of free will and ultimate comfort. That's why we developed the ErgoAdapt™ system. Whether you sit or lie down on the sofa the result is always the same: Ultimate comfort! Read more about ErgoAdapt™ on page 12.*

ErgoAdapt™

To accompany our recliners and sofas we developed a wide range of tables that fit perfectly into any furniture setup.

We love versatile furniture. That's why we produce innovative, purposeful furniture, like our double ottoman.

For every home, large or small, there's a place for a Stressless® theater setup. Read more about Stressless® theater seating on pages 52 - 59.

Discover the secrets of personal comfort

- ① Space-age foam is molded directly over the frame, to cushion your body.
- ② An additional pad of soft space-age foam ensures optimum comfort.
- ③ Super-soft polyester fiber cushions your body and ensures an attractive look.
- ④ Durable steel frame and flexo springs for superior resilience and continuous support.
- ⑤ Plus™ system provides continuous support for your head and lower back. Double-sided mechanism ensures maximum stability and functionality.
- ⑥ Genuine top-grain leather or fabric covers the entire seat, for a luxurious look and feel.
- ⑦ Unique Stressless® Glide system automatically adjusts to your body weight.
- ⑧ Two-stem base adds superior stability.
- ⑨ For maximum mobility, swivel actions lets you easily turn 360°.

Fits like a glove

It would be unfair to tailor the world's most comfortable recliners and sofas to fit just one body type. Just as our individual tastes vary, so do our bodies. That's why most Stressless® designs are available in up to three sizes, as one size does not fit all. Visually, the differences are subtle, but sit down and you'll realize that a recliner customized to your body makes all the difference.

One way to find your perfect recliner, is to take the Stressless® Comfort test™. It only takes a few minutes, and guides you through the world of advantages and patented features a Stressless® offers. It's worth investing some time in a more comfortable way of life.

Stressless® Vision (S), Stressless® Dream (M) and Stressless® Spirit (L) are shown in Classic Vanilla/Wenge. Our complete range of models is shown on pages 62-67.

Stressless® Dream Recliner is shown in Paloma Chilli Red/Black.

The headrest adjusts automatically, so you can read and watch TV, even in a reclining position.

The Plus™ system adjusts the lower back support simultaneously with the headrest. Upright or reclined, you're always perfectly supported.

Lower the headrest to the sleep position with one simple movement.

Adjust the Stressless® Glide wheels to the setting of your desire. You can automatically shift to any seating position simply by using your body weight.

Easy-to-move ottoman features built-in Glide system that adjusts to your body movement for ultimate comfort.

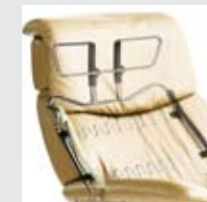

Share the comfort

We thought; why shouldn't a sofa be just as comfortable as a recliner? So, we started creating sofas with individual reclining seats. They were a huge success, and we continued our quest to make the world's most comfortable seats, giving our sofas more and more innovative benefits. Like adding the choice of low-back or high-back and the adjustable headrest for perfect neck support.

Style and good looks are important. But like our Stressless® recliners, relaxing in a Stressless® sofa is all about comfort and how superb your body feels when you are seated. That's why we started making Stressless® sofas in two different sizes, so that everyone could experience the Stressless® wonderful world of comfort.

The headrest adjusts automatically, so you can read and watch TV, even in a reclining position.

The Plus™ system adjusts the lower back support simultaneously with the headrest. Upright or reclined, you're always perfectly supported.

Lower the headrest to the sleep position with one simple movement.

Adjust the Stressless® Glide wheels to the setting of your desire. You can automatically shift to any seating position simply by using your body weight.

Adapts to you, and him, and her

Stressless® sofas and recliners are just like families – they come in many shapes and sizes. A sectional sofa, where each seat has an individually adjustable back, soon becomes both a playground and a cozy retreat. It's often the best spot for some of those unforgettable moments in life. You can be sure that a Stressless® sofa with individually adjustable backs can cater to your individual needs, while still being a gathering point for everyone. Join the comfort family today.

Different sizes, same great look

On many of our Stressless® sofas, we offer a choice of two sizes. The seat depth, adjustable backs and choice between high- or low-backs stay the same. It's the width we've adjusted, so even more Stressless® seating can be tailored to your body type. Applies to most of our Stressless® sofas.

Stressless® with ErgoAdapt™ system (Pat. pend.)

New options. More flexibility. Ultimate comfort!

This is the promise of the new technology of the ErgoAdapt™ system that makes sofas into a multifunctional comfort zone, which is built into the seat base of the fixed sofa and long seat of the new Stressless® models, E200 and E300. The seat tilts down automatically the moment you sit down, providing the most comfortable sitting angle. If you prefer to lie down, the seat elevates to the completely flat position. No matter what your choice is, the outcome is the same: Ultimate comfort!

Lying down flat, no tilt
When you lie down on the sofa, the seat stays completely flat, offering exquisite comfort and giving you the full advantage of the oversized seat.

From zero position to tilt position
The new Stressless® ErgoAdapt™ system automatically tilts the seat as you sit down – providing the perfect degree of comfort and support.

Mix, match, sit

Sofas serve different purposes. Some are for lounging and watching television, others are for welcoming guests around the table. Some are suited for long, lazy afternoons. Whatever your demands are, we have the right model to meet them. The choice between high- and low-backs is simply another example.

The smooth style of Jazz

Stressless® Jazz is a harmonious fusion of function and comfort that we've spent 35 years refining. Its elegant lines, smooth surfaces and stainless steel curves fit comfortably in the most contemporary of living spaces. And, of course, with our trademark Stressless® comfort, Stressless® Jazz sets just the right mood. The Stressless® Jazz and ottoman can be adjusted to match your height. Adding or removing any of the three rings on the base allows you to choose between low, medium or high settings.

Blues and Soul in perfect harmony

Stylish, soft and sophisticated – Stressless® Soul is one the newest additions to the Stressless® family, pairing up with last year's introduction the Stressless® Blues recliner. We've combined a sleek stainless steel frame and classical Stressless® lines with the patented Stressless® features to create a new fusion of comfort and style. Inviting family and friends for some comfortable quality time, accompanied by 'Blues' and 'Soul', has never felt more correct.

Glide into comfort

A Stressless® is a mechanical wonder. Why should we put less effort in making the perfect ottoman? You might not have noticed, but as you lie back in a recliner, your legs move slightly forward and your feet move down. A genuine Stressless® Ottoman recognizes this comfort detail. It automatically adjusts as you recline allowing for increased circulation, to maximize the comfort. The patented, built-in glide function makes the world's most comfortable recliner even more comfortable. What's more, you can lock the position and use it as an occasional seat. **Never sit or stand on the ottoman when it is not in the locked position.*

Adapts to you, and your room

Stressless® is a tailored seating concept designed to fit any room. Stressless® gives you the flexibility to choose between a number of combinations, to fit virtually any living space. Add the accessories that suit you, from armrest tables to ottomans with built-in glide function. All setups have individually adjustable seat backs, and a choice between high- or low-backs.

The combinations are available with the following models: Stressless® Arion, Stressless® Eldorado, Stressless® Granada, Stressless® Paradise Medium and Large, Stressless® Wave, Stressless® Space Medium and Large. See page 63 for all available sectionals and measurements.

Stressless® Arion sectional shown in Paloma Chilli Red/Steel Legs. Stressless® Double Ottoman. Our complete range of models is shown on pages 62-67.

Carefully selected fabrics

Not all fabrics can become a Stressless® textile. In fact, it took our international group of experts more than a year to narrow it down to those few qualities that meet the demands of our new fabric series. On top of being flame-retardant, environmentally-friendly, super-strong and still smooth, they also have to follow the latest trends in color and texture.

Why not combine fabrics and leather in a dynamic home environment? The colors and textures of our new fabric series blend perfectly with leather upholstery. For examples, see Stressless® Arion on this page or Stressless® Wave on page 40.

Heaven is a twist away

A Stressless® is engineered to be more stable, to recline further and to adjust smoother. It simply delivers what our customers have come to expect.

That means it's more responsive to the way your body moves. You never have to force it to do anything – move, and it moves with you. Your key to it all is the Stressless® Glide wheel. Adjust its tension to suit your personal needs.

Thanks to our double-stem base, you can swivel 360 degrees and never feel a hint of instability.

Stressless® Vegas Recliner shown in Classic Vanilla/Natural.

Size matters

We keep coming back to sizes. That's because we can not emphasize enough the importance of finding a sofa or recliner that's practically built for you. With Stressless®, that's possible. All of our Stressless® recliners are available in multiple sizes and several of our sofa models are as well. The Granada and Eldorado, for example, are essentially the same design in varying sizes. You decide which model is the right fit for you.

Comfort *test*™

- Are the height and width of the chair right for you?
- Is the ottoman positioned in the right place to give you maximum leg support?
- Does the chair and ottoman move with you as you shift positions?
- Does the gliding movement smoothly adjust to your body weight?
- Does the chair provide good lumbar support in all positions?
- Is your head supported comfortably as you lie down to read or watch TV?
- Can you adjust the headrest so that it lies flat when you recline?
- Do you have the feeling that the seat back reclines sufficiently?
- Are you aware of how your entire body relaxes?
- Is the recliner complemented by a matching reclining sofa?

Stressless® Swing Table

Why name a table Swing? Because that's what you do with it when you're through using it. The Stressless® Swing Table is another accessory that optimizes the pleasure of the world's most comfortable recliner. This small, versatile table carries your remote, your cup, your book or whatever else you like to keep handy. It fits most recliners with our famous round base, except Stressless® Vision, Spirit, Dream, Jazz and Blues.

Stressless® Personal Table

Ever notice how your laptop has a tendency to follow you into your favorite recliner? Stressless® has met the needs of modern life with the Stressless® Personal Table, a soon-to-be-indispensable accessory in your home. It attaches to any Stressless® recliner* and provides a firm, stable working space right over your lap. That means no more thigh-burns from hot computers and a more ergonomic work position. And when you need a break, simply swing the table aside and fold it down. *Available only on models with wooden bases.

STRESSLESS® ELDORADO

EKORNES® MANHATTAN

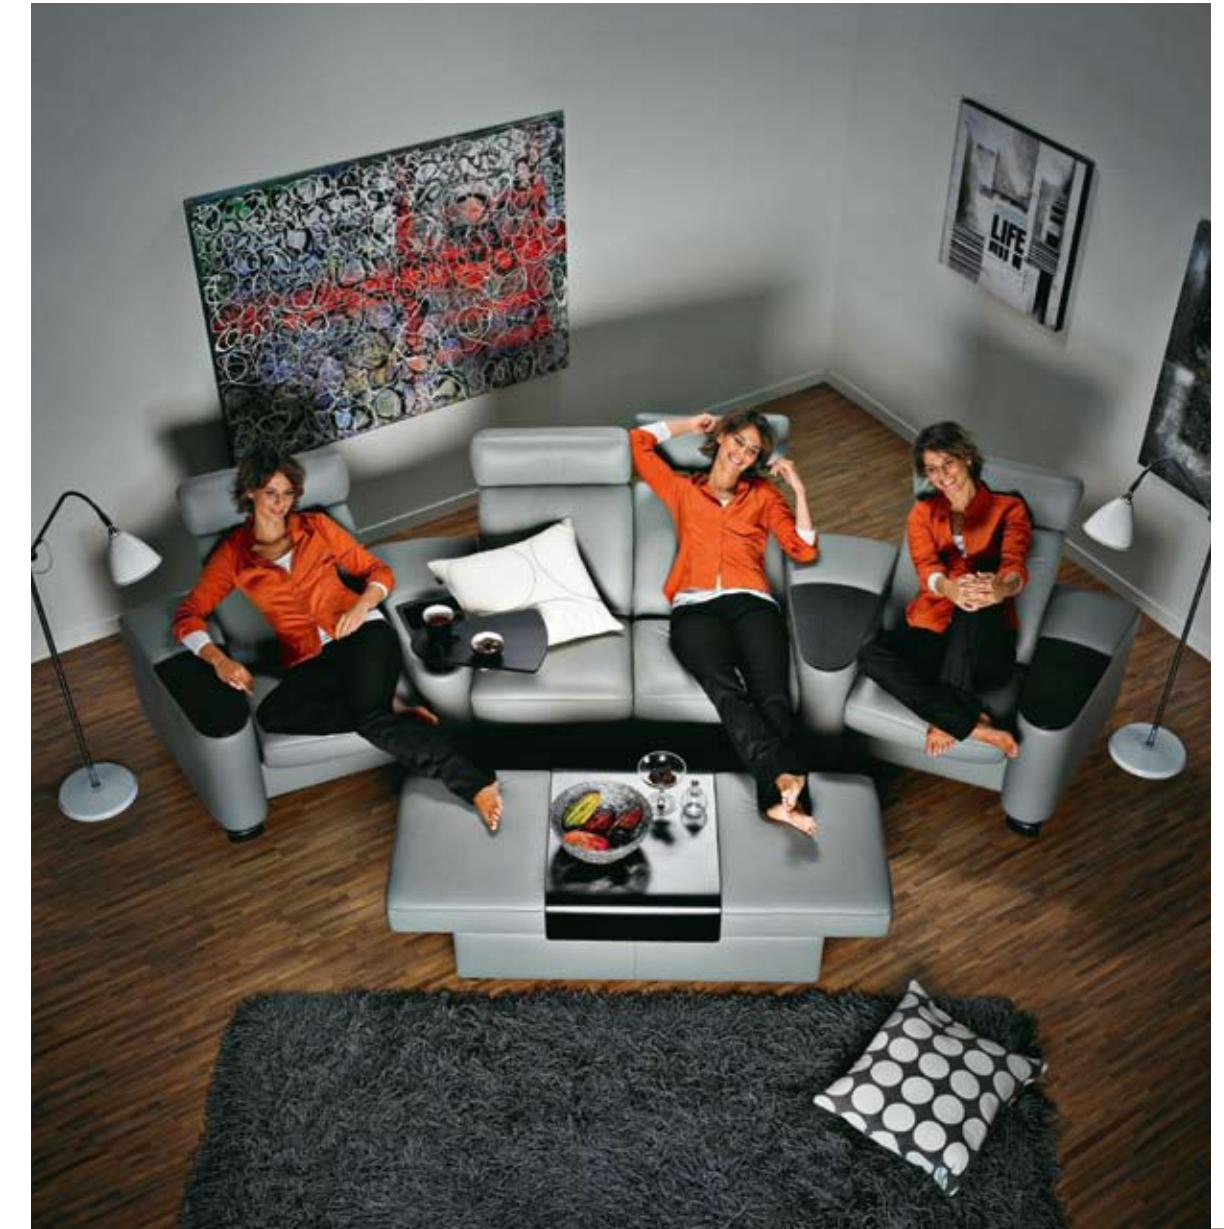

Home theater seating. Rated “c” for comfort.

Did you know that you move more than 300 times while watching a film? These constant changes in position are exactly what Stressless® is designed for.

With its rapid development in technology, the home theater is quickly becoming the family’s favorite room. Fortunately, innovation in furniture has finally caught up with all those impressive screens and speaker systems.

With a Stressless® Home Theater setup, you can forget about squeaky rows of hard seats and people with big hairdos who always wind up right in front of you. Stressless® provides you with individually adjustable seats, perfect neck and lumbar support, and a row of accessories like armrest tables and ottomans. Life in the movies has never felt or looked this good.

Stressless® Space Medium SCA 121 shown in Paloma Grey/Wenge. Stressless® Double Ottoman. Our complete range of models is shown on pages 62-67.

Enjoyment is within reach

Have you noticed how remotes, popcorn, sweets and other valuable items tend to clutter your home theater? With Stressless® Home Theater seating, that's no longer a problem. Place them on, or even inside the Stressless® Double Ottoman or the Sector Table and armrest. You see: when we make furniture, it's all thought through – all the way up to the closing credits.

Stressless® Wave CT 121 shown in Batick Snow/Round wooden legs. Stressless® Easy Armrest Table and Ekornes® Corner Table in Wenge. Stressless® Double Ottoman.

Neat and stylish at the same time

A Stressless® Home Theater setup will look great and heighten the movie experience.

The patented Plus™ system lets the neck support move in parallel to the lumbar support. Add the height-adjustable headrest, and you're good to go for hours in front of the screen. You can choose the ordinary armrest and enjoy the practicality of the Stressless® Easy armrest table and the Stressless® Corner table that give flexibility in furnishing your home theater. Or, you can choose the upholstered Sector table and Sector Arm; these can replace the armrest in fixed arrangements. In addition, you can always fit our smart and innovative ottomans into your home theater setup.

Stressless® Wave SC 11 shown in Classic Ice Blue/Round Steel legs. Stressless® Oval Ottoman.

Stressless® Wave SCA 11 shown in Classic Ice Blue/Round Steel legs. Stressless® Oval Ottoman. Our complete range of models is shown on pages 62-67.

Everyone gets front row

All home entertainment, big or small, can fit a Stressless® Home Theater setup. The genius lies in its flexibility, which fit together in a whole array of creative solutions. Pick your favorite model, and check the chart on the opposite page to find your ideal configuration. Front, center and aisle – they all feel equally good.

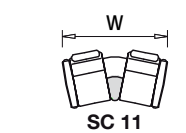

*Stressless® Space Large SC 121 shown in Paloma Kitt/Steel Hoops.
Stressless® Space Large SC 111 shown in Paloma Kitt/Steel Hoops.
Stressless® Double Ottoman.*

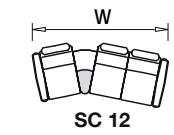

The Stressless® Sector (SC) and Stressless® Sector Arm (SCA) with table is upholstered like the sofa and hides a storage space under its top. The Sector/Sector Arm also functions as an armrest, which is why setups with Sector/Sector Arm should be treated as a fixed unit.

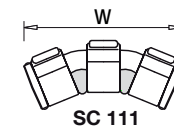

Ekornes® Corner Table (CT) combines the need for a table with the need for individual positioning of the chairs and sofas. The Corner Table is free-standing, allowing you to re-organise the furniture when needed. Corner Table can be placed with any chair/sofa combination.

Stressless® Home Theater solutions can be arranged in many different ways to best fit your home and lifestyle. We've sketched a few possible configurations from a variety of our styles. See www.ekornes.com for a complete overview and measurements for each model.

Ekornes® offers four types of leathers – each in a full range of colors

BATICK is a corrected, pigment improved and grain embossed upholstery leather, which has had most of its natural marks removed. Batick may have a two-tone color effect to liven up the surface. Batick is resistant to fading, although changes in color will occur over time due to use and exposure to light. A protective layer of lacquer simplifies cleaning. Simple cleaning, excellent durability and a reasonable price make Batick a good choice.

CLASSIC is a corrected, pigment improved and grain embossed upholstery leather. Classic is somewhat thicker and has a larger pebbled grain than Batick. Most of its natural marks are removed. Also some of the Classic colors have a two-tone color effect to liven up the surface. A protective layer of lacquer simplifies cleaning. Classic is a wise choice if you want leather with excellent durability.

PALOMA is a slightly corrected leather with a combination of dyes and pigments that smoothes down some of the structure (the grain pattern) of the leather. The grain structure in Paloma may however vary a little at some parts of the furniture and also minor color nuances may appear in the leather. Natural marks, scars and insect bites are natural and will appear in Paloma. A thin coat of lacquer gives Paloma some protection and simplifies cleaning, but Paloma does not have the same heavy duty quality and protection as Batick and Classic. Due to its soft, natural and comfortable expression, Paloma is a very popular choice.

ROYALIN is the most exclusive of Ekornes's leather types, but also the most vulnerable. Royalin is a type of leather with natural pebbled grain and structure, and may have minor color nuances and some natural marks. This is characteristic for a natural material such as Royalin. A very light surface treatment provides a certain protection, but Royalin absorbs moisture easily, and is extra vulnerable to wear and tear, heat, sunlight, spills and perspiration. This requires greater care in use and more vulnerability to influence from direct contact with human skin (especially from neck/hair and hands). Royalin has the softness and a rich warm glow that characterize first class furniture leather. Variances including grain pattern and color are an inherent feature within Royalin leather and are a natural mark of high quality.

Ekornes® upholstery leather

Ekornes is one of Europe's largest consumers of leather. We purchase the leather from selected tanneries all over the world. Our own inspectors take part in the leather selection, which is conducted in accordance with international norms for quality determination. The experience we have gained from this work is for your benefit when you buy Stressless® or Ekornes® leather furniture. Our leather is manufactured according to current laws, guidelines and recommendations on durability, and for the use and content of chemicals and other substances. We are cooperating with recognized international institutions in this line of business to ensure that we are updated at all times with events relating to health, safety and the environment.

The leather for our furniture is a natural material that comes from cattle hides.

When the hide has gone through a tanning process and further processing to achieve the correct durability properties, it is called leather. One characteristic of a hide is that it is marked by nature, vegetation and the care the animal has been subjected to. Cattle spend most of their lives outdoors and will therefore be marked by external influences like insect bits, tears, scars, wrinkles, stretch marks, etc.

The following are some of the properties of leather that you should be aware of:

Leather is a natural product and is a beautiful and lively material used in furniture making. Each hide is unique in its structure, appearance, nuance and size. Ekornes may use several hides when making your furniture. This, together with the leather's play of colors and natural marks, makes each piece of furniture unique. In time, the leather will age and gain patina. It is important that you are aware of one thing: although leather furniture can withstand a lot of wear and tear, its appearance will change with the years.

The following applies to all types of leather used by Ekornes:

Hide absorbs dyes differently and therefore the leather may have color nuances. These are due to dissimilarities and different fiber structures, which affect the coloring of the hide and how the hide absorbs the dyes during the tanning process.

All our leather qualities are deep dyed, but there could always be a deviation between the basic color of the hide (the color of the side that faces the upholstery side of the furniture), and the color of the grain side (the external side) i.e. the color of the outer layer. This is normal. It is possible to use the same basic color for leathers with different top colors.

Dyes and dyeing methods may vary between the different leather colors and leather qualities. Therefore the basic color and the color of the top layer (which forms the wear layer and the final desired color of the finished product) of a given leather quality may differ.

Some of the leather dyes have a two-tone color effect (shadow/antique effect). Leather dyed with a two-tone effect may change character faster and wear more unevenly than leather with just one color. This applies in particular to areas of the furniture that are exposed to harder wear such as armrests, seat cushions and neck supports.

The top layer protects the leather and simplifies cleaning, but is nonetheless vulnerable to soiling and wear. If the top layer/top color is destroyed, the leather may deteriorate faster. Penetrating spills/damage/scratches are normally irreparable and may result in the top color changing character, cracking or peeling off.

Please note that denim clothing and jeans may leave color on the leather which is difficult to remove without risking destruction of the top color of the leather. Light leather colors in particular are vulnerable to such color contamination.

All furniture leather sold by Ekornes is resistant to light, but changes in color may occur as a result of use and extensive exposure to light. Consequently, furniture should not be exposed to direct sunlight or direct heat from heaters and other sources of heat. Leather is vulnerable to exposure to oils from direct contact with human skin (especially of the neck and hands).

Remember: leather has a relatively long life-time but can easily be destroyed by incorrect handling.

Fabric

Stressless® offers you a completely new feeling of comfort; five contemporary, warm and luxurious fabric collections that complement our range of four leather categories. Choose from Dinamica, Cocoon, Natura, Oasis and Placidus ranges, all available in a wide range of colors on specially chosen models, so you'll find the perfect match for any interior.

About fabric

Please note that color changes will occur with time, as a result of use and the effect of light. Furniture should be protected from direct sunlight. To prolong the life and the appearance of the furniture, the fabric upholstery should be regularly vacuumed and professionally dry cleaned.

The Stressless® wooden colors

Made from laminated European beech, a light-colored wood with an attractive grain, exceptionally suitable for staining in various colors. Also, the strength of the wood makes beech furniture extremely durable.
